# Day 1 Procedures: Linking Students

Advance preparation (before putting students on devices):

- Introduce students to ST Math and the password.
- Teach students how they will enter student information. You may give each student a *Ticket to JiJi* showing the steps. You can download a *Ticket to JiJi* from the TRS.

## Steps to be completed by each student on their device:

Linking NEW students:

1

At the JiJi screen, instruct students to click 🐧.

2

Have students enter their first names, then click the green arrow button.

Students enter their last names, then click the green arrow button.

3

Next, students should choose their grade.

Finally, students should choose their teacher.

4

The green status frame means the student is ready to be linked. Students should *Play the Gray* while waiting for the teacher.

Linking RETURNING students:

1

At the JiJi screen, instruct students to click JiJi.

2

Have students log in using their existing picture passwords.
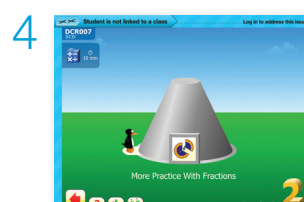

Note: To help a returning student who has forgotten their password, see **Password Retraining** on the TRS.

3

Next, students should choose their grade.

Finally, students should choose their teacher.

4

The blue status frame means the student is ready to be linked. Students should *Play the Gray* while waiting for the teacher.
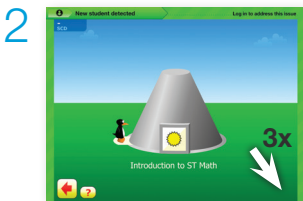

Day 1 Procedures: Linking Students

Steps to be completed by teacher:

Important: After new students are linked to your class, they will need about 20 minutes to learn their passwords.
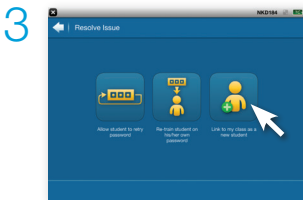

1

The green (new) and blue (returning) status frames indicate that students need to be linked.

2

On one student device, triple-click at the bottom-right corner of the status frame to log in.

Note: While waiting for the teacher, students play ST Math games.

3

Click **Link to my class as a new student**.

4

Select the students you wish to link, or click the **Select All** check mark to link all students.

5

If you created more than one class, use the Class dropdown to select the class, then click the **Link selected students** button.
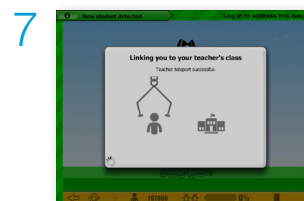

Tip: Notify students that they are about to be linked and should continue to *Play the Gray*.

6

If you have additional students to link (e.g. for another class), click **Continue Linking** to return to the linking screen. Otherwise click **Done Linking**. Check to make sure there are no remaining green or blue status frames and all students have started the password training to confirm the linking process is complete.

Note: If you choose **Continue Linking** and there are no students ready to be linked, you will see this screen. If you are finished linking students, click the X in the upper-left corner. If there are still students to link with blue or green status frames, click the refresh button in the upper-right corner and repeat steps 5 and 6.

7

Once students are linked to the class, new students will learn their password while returning students play the first curricular objective.
